

DOBLADORAS CNC MUELLES DE COMPRESION

BB Spring Technology is an Italian company founded in 2014 specialized in the wire machine manufacturing with many years of experience in the Industry.

At the beginning, the focus was to provide assistance to the owners of Bobbio's machines, then the company has established itself as producer of own coilers and reels able to provide customized solutions both on the national and international market.

The whole process starting from design, engineering and production is developed at our headquarter located near Como Lake. It is a building of more than 1000sqm which houses both staff offices and production workshop.

ROBBO CNC 600-35

In the future, we cannot forget the past, this is the reason why we can upgrade and revamping all coiling machines branded Bobbio. The machines are totally revised both electronically and mechanically.

OUR PRODUCTS

BB-150KG | BB-2MM

INNOVAZIONE, QUALITÀ E FLESSIBILITÀ.
Guidati da questi valori siamo alla costante ricerca di componenti innovativi e tecnologie all'avanguardia, mantenendo come scopo principale quello di fornire ai clienti prodotti con alta produttività, precisione ed efficienza.

INNOVATION, QUALITY AND FLEXIBILITY.
To fulfill this goal there is a constant research of innovative components and forefront productive solutions in order to keep up the coiling machines with the innovations of the Industry ensuring customers with high productivity, precision and efficiency.

Le nostre avvolgitrici sono totalmente configurabili con diversi assi opzionali. Questa modularità ci permette di rispondere alle esigenze di qualsiasi cliente partendo da un modello base e competitivo fino ad una macchina più versatile ed evoluta.

Le nostre macchine non si limitano a produrre molle a compressione e a trazione, ma anche molle a torsione grazie ad un dispositivo opzionale.

Oltre alle avvolgitrici produciamo aspi svolgitori che lavorano in perfetta sinergia con le nostre macchine garantendo prestazioni elevate.

All machines are totally configurable with several optional axis. Thanks to this wide modularity we can meet all customers' needs, from a standard and competitive machine to a more versatile and advanced model.

Our machines produce compression, traction and torsion springs with an optional device.

In addition to coiling machines, we also provide reels which match perfectly with our machines performing at a very high level.
